## Program Outcomes (PO):

- Gain a complete exposure to the theories and practices of Computer science.
- Get transformed into a skilled learner and active programmer, enabling the students to focus on their

higher studies.

- Value computer professionals and programmers.
- Explore how the concepts and applications of Computer science lead to innovative thinking with a problem-solving attitude.

## **Program Specific Outcomes (PSO):**

- Understand the basic Computer knowledge and practical application in operating system.
- Understanding the concept of programming and develop program in C++.
- Understanding the concept of data structure and implementation with C++.
- Understanding the concept of DBMS and implementation in MySQL /Oracle.
- Understanding the concept of OOPs and Java programming and develop program in Java.
- Understanding the concept of web technology and its implementation with HTML/CSS/DHTML/PHP.
- Understand the basic concept of internet of things (IOT).

Understanding the basic concept of cyber security and cyber law.

Understanding the basic concept of Artificial Intelligence.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 30               |

- 13. Write a program in C++ for multiple inheritance.
- 14. Write a program in C++ for operator overloading.
- 15. Write a program in C++ for friend class and friend function.
- 16. Write a program in C++ for virtual function and virtual class.
- 17. Write a program in C++ for Exception Handling.
- 18. Write a program in C++ to open and close a file using file Handling.
- 19. Given two ordered arrays of integers, write a program to merge the two-arrays to get an ordered array.
- 20. WAP to display Fibonacci series (i) using recursion, (ii) using iteration
- 21. WAP to calculate Factorial of a number (i) using recursion, (ii) using iteration
- 22. WAP to calculate GCD of two numbers (i) with recursion (ii) without recursion.
- 23. Create a Matrix class using templates. Write a menu-driven program to perform following Matrix Operations (2-D array implementation): a) Sum b) Difference c) Product d) Transpose 22. Create the Person class. Create some objects of this class (by taking information from the user). Inherit the class Person to create two classes Teacher and Student class. Maintain the respective information in the classes and create, display and delete objects of these two classes (Use Runtime Polymorphism).
- 24. Create a class Triangle. Include overloaded functions for calculating area. Overload assignment operator and equality operator.
- 25. Create a class Box containing length, breadth and height. Include following methods in it: a) Calculate surface Area b) Calculate Volume c) Increment, Overload ++ operator (both prefix & postfix) d) Decrement, Overload -- operator (both prefix & postfix) e) Overload operator == (to check equality of two boxes), as a friend function f) Overload Assignment operator g) Check if it is a Cube or cuboid
- 26. Create a structure Student containing fields for Roll No., Name, Class, Year and Total Marks. Create 10 students and store them in a file.
- 27. Write a program to retrieve the student information from the file created in the previous question and print it in the following format: Roll No. Name Marks
- 28. Copy the contents of one text file to another file, after removing all whitespaces.
- 29. Write a program for exception handling.
- 30. Write a program to insert data into file and to display it.

Note: Concerned teacher can add additional practical exercises as per requirement.

Name and Signature of Convener & Members of CBoS:

traversing using priority queue.

- 17. Write a program to implement the concept of priority-based element traversing using priority queue.
- 18. Write a program to create binary search tree using the concept of linked list and array, suppose data set will be given at the run time.
- 19. Write a program to create a binary tree with any data set and traverse the data items in pre-order, in-order and post-order manner using recursion.
- 20. Write a program to perform deletion of any data item from the binary search tree.
- 21. Write a program to find the height of any tree.
- 22. Write a program to create any given undirected graph using the adjacency matrix, and print each node/element with list of its adjacent elements.
- 23. Write a program to find the height of any given tree.
- 24. Write a program to traverse the element of given graph according BFS and DFS.
- 25. Write a program to find the minimum spanning tree of any given graph.
- 26. Write a program to search any run time given element from the array of 10 elements in the array are unsorted.
- 27. Write a program to demonstrate the binary search.
- 28. Write a program to find the smallest and largest element in any array.
- 29. Write a program to arrange the data items of any array in ascending order.
- 30. Write a program to arrange the data items of any array in descending order using quick sort.

KUJUF

Note: Concerned teacher can add additional practical exercises as per requirement.

Keywords

Array, Linked List, Stack, Queue, raversing, Tree, Graph, Searching, Sorting, Hashing.

Text Books, Reference Books and Others

### Text Books Recommended:

- Database system concept, H. Korth and A. Silberschatz, TMH Publications.
- Data Base Management System, Alexies & Mathews, Vikash publication.
- Data Base Management System, C. J. Date , Narosha Publication.
- Data Base Management System By James Matin.

### Reference Books Recommended:

- Principles of Database System By Ullman.
- Program Design, Peter Juliff, PHI Publications.
- The Complete Reference, Kevin Loney, Oracle Press.
- SQL, PL/SQL The Programming Language of Oracle, Ivan Bayross, PustakKosh Publication.
- Microsoft SQL Server Management and Administration, Ross, STM Publications.

- 7. Create a new database in Oracle/SQL Server having at least five tables for the Hotel Management System.
- 8. Create a new database in Oracle/SQL Server having at least four tables for Covid Vaccination Management System.
- 9. Create a new database in Oracle/SQL Server having at least five tables for the Library Management System.
- 10. Create a new table in Oracle/SQL Server and practice for Group by and Order by Clause.
- 11. Create a new table in Oracle/SQL Server and practice for max(), min(), avg() and count() functions.
- 12. Create a new table in Oracle/SQL Server and practice for lower(), substr(), trim() and upper() functions.
- 13. Create a new table in Oracle/SQL Server and practice for unique and check constraints.
- 14. Create a new table in Oracle/SQL Server and practice for any two date formats.
- 15. Create a new table in Oracle/SQL Server and practice using clauses.
- 16. Create a new table in Oracle/SQL Server and practice for having clauses with sub queries.
- 17. Create a new table in Oracle/SQL Server and practice for aliases in any table.
- 18. Create a new table in Oracle/SQL Server and practice for inner and outer join.
- 19. Create a new table in Oracle/SQL Server and practice for Drop command.
- 20. Write a PL/SQL program for addition of two numbers.
- 21. Write a PL/SQL program to find the factorial value of any entered number.
- 22. Write a PL/SQL program for swapping of two numbers.
- 23. Write a PL/SQL program to print the first ten Natural Numbers.
- 24. Write a PL/SQL program to generate even series upto five digits starting from 2 and sum all the terms.
- 25. Write a PL/SQL program to practice for implicit and explicit cursors.

**Note:** Concerned teacher can add additional practical exercises as per requirement.

Keywords

TABLE, SQL, PL/SQL.

| PART -D: Assessment | t and Evaluation |
|---------------------|------------------|
|---------------------|------------------|

**Suggested Continuous Evaluation Methods:** 

Maximum Marks:

100 Marks

Continuous Internal Assessment (CIA):

30 Marks

End Semester Exam (ESE):

70 Marks

Continuous Internal

Internal Test / Quiz-(2): 20 +20 Assignment / Seminar - 10

10

30

Better marks out of the two Test / Quiz obtained marks in Assignment shall be considered against 30 Marks

Assessment (CIA): (By Course Teacher)

Total Marks Two section – A & B

End Semester Exam (ESE):

Section A: Q1. Objective – 10 x1 = 10 Mark; Q2. Short answer type- 5x4 = 20 Marks

Section B: Descriptive answer type qts., 1 out of 2 from each unit-4x10=40 Marks

9. Write HTML code to create the following table:

| Maruti     |       | Tat     | ta    | rd    |       |
|------------|-------|---------|-------|-------|-------|
| Model      | Price | Model   | Price | Model | Price |
| Maruti 800 | 2 Lac | Sumo    | 2 Lac | Icon  | 5 Lac |
| Omni       | 3 Lac | Scorpio | 3 Lac | Gen   | 2 Lac |

10. Write HTML code to create the following table:

| Pandit Ravishankar Shukla University |          |       |  |  |  |
|--------------------------------------|----------|-------|--|--|--|
| Name                                 | Roll No. | Class |  |  |  |
| Rahul                                | 40       | BCA-I |  |  |  |
| Preeti                               | 85       | BCA-I |  |  |  |
| Priya                                | 74       | BCA-I |  |  |  |
| Richa                                | 95       | BCA-I |  |  |  |

11. Write HTML code to create the following table:

**Students Record** 

| Name   | Subject | Marks |
|--------|---------|-------|
| Arun   | Java    | 70    |
|        | С       | 80    |
| Ashish | Java    | 75    |
|        | С       | 69    |

12. Write HTML code to create the following table and also insert an image in the webpage.

| Subject          | Max | Min | Obtain |
|------------------|-----|-----|--------|
| Java             | 100 | 33  | 75     |
| Multimedia       | 100 | 33  | 70     |
| Operating System | 100 | 33  | 68     |
| C++              | 100 | 33  | 73     |

13. Write HTML code to create the following table:

| Name       | Rahul<br>101 |     |        |  |
|------------|--------------|-----|--------|--|
| Roll No    |              |     |        |  |
| Subject    | Max          | Min | Obtain |  |
| Java       | 100          | 33  | 75     |  |
| Multimedia | 100          | 33  | 70     |  |

| 1. Create a web page which                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | h shows the changes of header dynamically.                                                                            |

- 2. Create a webpage which explains the use of relative positioning.
- 3. Display an alert box to alert the x and y coordinates of the cursor.

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

#### PHF

- 1. write script using for loop to print all integer between -10 to 10
- 2. write script to construct the following pattern, using nested for loop

1 1 2 1 2 3 1 2 3 4 5

- 3. Write a PHP script to get the largest key in an array.
- 4. Write a function to calculate the factorial of a number (a non-negative integer).
- 5. Write a PHP script to check string for palindrome.
- 6. Write a PHP script to collect the data from the registration form designed in HTML, and submit it to the database.
- 7. Write a PHP script to read the data from the database and display it into the web page in tabular form.

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

### **MySQL**

### Task - I

Create the following table in MySQL:

College (cname, city, caddress, cphone)

Staffjoins (sid, cname, dept, doj, post, salary)

Staffs (sid, sname, saddress, scontacts)

Teaching (sid, class, paprid, fsession, tsession)

Subject (paperid, subject, paper, papername)

Write the queries to perform the following operations.

- 1. List the name and post of a teacher teaching a computer subject.
- 2. List the name and city of all staff working in your college.
- 3. List the name and city of all staff working in your college who earn more than 15000.
- 4. Find the staff whose date of joining is 2005.
- 5. Find the staff whose names start with 'M' or 'R' and 'A' and/or 7 characters long.
- 6. Modify the database so that staffN1 now works in C2 college.
- 7. List maximum, average, minimum salary of each college.
- 8. Acquire details of staff by name in a college or each college.
- 9. List names of staff in ascending order according to salary who are working in all colleges.
- 10. Find the staff that earn a higher salary who earn greater than the average salary of their college.

#### Task - II

Create the following table MySQL:

Enrollment (enrollno, name, gender, DOB, address, phone)

Admission (adno, enrollno, course, yearsem, date, cname)

Feestucture (course\_yearsem, fee)

Payment (billno, admno, amount, pdate, purpose)

Write the queries to perform the following operations.

- 1. Get full detail of all students who took admission this year class wise.
- 2. Get details of students who took admission in sai colleges.
- 3. Calculate the total amount of fees collected in this session.
- 4. List the students who have not paid full fees in your colleges.
- 5. List the number of admission in your college every year.
- 6. List the students in colleges in your city and also live in your city.

#### Task - III

Create the following table MySQL: Subject (paperid, subject, paper, papername) test(paperid,tdate,max,min) score(rollno,paperid,marks,attendance) students(admno,rollno,class,yearsem)

Write the queries to perform the following operations.

- 1. List roll no of students who were present in a paper of a subject.
- 2. List all roll numbers who have passed in first division.
- 3. List all students in BCA-II who have scored higher than average in your college.

Note: Concerned teacher can add additional practical exercises as per requirement.

Keywords

HTML, Hyperlinks, Form, List, Table, CSS, JavaScript, MySQL, PHP.

Write a fur                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | nction that take<br>+ 1/3! + +                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | _n'as input and c                                                                                              | calculat                                                             | es the value of I +                                                                                                         | 3                               |

- 8. Write a function that takes an integer input and calculates the factorial of that number.
- 9. Write a function that takes a string input and checks if it's a palindrome or not.
- 10. Write a list function to convert a string into a list, as in list (\_abc') gives [a, b, c].
- 11. Write a program to generate Fibonacci series.
- 12. Write a program to check whether the input number is even or odd.
- 13. Write a program to compare three numbers and print the largest one.
- 14. Write a program to print factors of a given number.
- 15. Write a method to calculate GCD of two numbers.
- 16. Write a program to create Stack Class and implement all its methods. (Use Lists).
- 17. Write a program to create Queue Class and implement all its methods. (Use Lists)
- 18. Write a program to implement linear and binary search on lists.
- 19. Write a program to sort a list using insertion sort and bubble sort.
- 20. Python program to remove the "i" th occurrence of the given word in a list where words repeat.
- 21. Python program to count the occurrences of each word in a given string sentence.
- 22. Python program to check if a substring is present in a given string.
- 23. Python program to map two lists into a dictionary.
- 24. Python program to count the frequency of words appearing in a string using a dictionary.
- 25. Python program to create a dictionary with key as first character and value as words starting with that character.
- 26. Python program to find the length of a list using recursion.
- 27. Python program to read a file and capitalize the first letter of every word in the file.
- 28. Python program to read the contents of a file in reverse order.
- 29. Python program to create a class in which one method accepts a string from the user and another prints it.
- 30. Study and Implementation of Database, Structured Query Language and database connectivity.

Keywords List, Tuple, Dictionary, Panda, Numpy, TensorFlow, Scikit-Learn, Keras, PyTorch, SciPy.

- 13. Write a program in C++ for multiple inheritance.
- 14. Write a program in C++ for operator overloading.
- 15. Write a program in C++ for friend class and friend function.
- 16. Write a program in C++ for virtual function and virtual class.
- 17. Write a program in C++ for Exception Handling.
- 18. Write a program in C++ to open and close a file using file Handling.
- 19. Given two ordered arrays of integers, write a program to merge the two-arrays to get an ordered array.
- 20. WAP to display Fibonacci series (i) using recursion, (ii) using iteration
- 21. WAP to calculate Factorial of a number (i) using recursion, (ii) using iteration
- 22. WAP to calculate GCD of two numbers (i) with recursion (ii) without recursion.
- 23. Create a Matrix class using templates. Write a menu-driven program to perform following Matrix Operations (2-D array implementation): a) Sum b) Difference c) Product d) Transpose 22. Create the Person class. Create some objects of this class (by taking information from the user). Inherit the class Person to create two classes Teacher and Student class. Maintain the respective information in the classes and create, display and delete objects of these two classes (Use Runtime Polymorphism).
- 24. Create a class Triangle. Include overloaded functions for calculating area. Overload assignment operator and equality operator.
- 25. Create a class Box containing length, breadth and height. Include following methods in it: a) Calculate surface Area b) Calculate Volume c) Increment, Overload ++ operator (both prefix & postfix) d) Decrement, Overload -- operator (both prefix & postfix) e) Overload operator == (to check equality of two boxes), as a friend function f) Overload Assignment operator g) Check if it is a Cube or cuboid
- 26. Create a structure Student containing fields for Roll No., Name, Class, Year and Total Marks. Create 10 students and store them in a file.
- 27. Write a program to retrieve the student information from the file created in the previous question and print it in the following format: Roll No. Name Marks
- 28. Copy the contents of one text file to another file, after removing all whitespaces.
- 29. Write a program for exception handling.
- 30. Write a program to insert data into file and to display it.

Note: Concerned teacher can add additional practical exercises as per requirement.

Keywords

Array, Function, Structure, union matrix, constructor, destructor, inheritance.

NPTEL :: Computer Science and Engineering - NOC : Computer architecture and organization

#### PART -D: Assessment and Evaluation Suggested Continuous Evaluation Methods: Maximum Marks: 100 Marks Continuous Internal Assessment (CIA): 30 Marks

End Semester Exam (ESE): 70 Marks Internal Test / Ouiz-(2): 20 +20 Better marks out of the two Test / Ouiz Continuous Internal Assignment / Seminar -10 Assessment (CIA): obtained marks in Assignment shall be considered against 30 Marks

Total Marks -30 (By Course Teacher) Two section - A & B

> Section A: Q1. Objective - 10 x1= 10 Mark; Q2. Short answer type- 5x4 = 20 Marks Section B: Descriptive answer type qts.,1 out of 2 from each unit-4x10=40 Marks

Name and Signature of Convener & Members of CBoS: Dr. H.S. Hoba

|                                                                                                                                                                                                                                                                                                                                               | Course Learning Outcomes (CLO)  At the end of this course, the students will be able to:  Gain a deep understanding of advanced AI and machine learning printout Acquire skills for conducting a thorough literature review and form research problems.  Learn to design and implement advanced AI and machine learning algorithms.  Can understand and design generative AI techniques.  Can apply AI and machine learning techniques to solve real-world problems. |                                                                                                                |                                                               |                                                                                                                | mulating<br>gorithms |           |

Text Books, Reference Books and Others

### Text Books Recommended:

- Machine learning, Anuradha Srinivasaraghavan, Vincy Joseph, Wiley publication, India, 2019 edition.
- Introduction to Machine Learning with python A guide for data scientists, Andreas, C. Muller & Sarah Guido, O'Reilly.

### Reference Books Recommended:

- Understanding machine learning: From theory to algorithms, shai shalev-shwartez, shai bendavid, Cambridge University press.
- Machine learning with python, Abhishek Vijayvargia, BPB publication.
- Machine learning using python, U Dinesh Kumar, Manaranjan Pradhan, Wiley publication.
- Deep learning, Ian Goodfellow, Yoshua Bengio, Aoran Courville, Adaptive computation and machine learning series.
- Machine learning, Tom M. Mitchell, McGraw Hill, Indian Edition.

- number of balconies, number of houses of years a house has been built predict the price of a house.
- 11. Implement a classification/ logistic regression problem. For example based on different features of students data, classify, whether a student is suitable for a particular activity. Based on the available dataset, a student can also implement another classification problem like checking whether an email is spam or not.
- 12. Use some function for neural networks, like Stochastic Gradient Descent or back propagation algorithm to predict the value of a variable based on the dataset of problem.

Note: List of experiments may be changed by the concerned teacher.

Keywords

Artificial Intelligence (AI), Linear Regression, Logistic Regression, Artificial Neural Network (ANN).

### PART -D: Assessment and Evaluation

**Suggested Continuous Evaluation Methods:** 

Maximum Marks:

50 Marks

Continuous Internal Assessment (CIA):

15 Marks

End Semester Exam (ESE):

35 Marks

Continuous Internal Assessment (CIA): (By Course Teacher)

Internal Test / Quiz-(2): 10 & 10 Assignment/Seminar + Attendance - 05 Total Marks -

Better marks out of the two Test / Quiz

+ obtained marks in Assignment shall be considered against 15 Marks

**End Semester Exam** (ESE):

Laboratory / Field Skill Performance: On spot Assessment

A. Performed the Task based on lab. work

Managed by Course teacher as per

B. Spotting based on tools & technology (written) - 10 Marks C. Viva-voce (based on principle/technology)

lab. status

# Text Books, Reference Books and Others

### Text Books Recommended:

- Principles of soft computing, S.N. Shivanandan and S.N. Deepa, Wiley publication, Wiley India Edition.
- Neural network and Learning Machines, Simon Haykin, Pearson Education, 2011.
- Artificial Neural Networks, Robert J. Scholkoff, McGraw Hill Education (India) Pvt. Limited, 1997.
- Fuzzy Sets, Uncertainty and Information, G. J. Klir and T.A. Folger, PHI learning private limited. Publisher—Pearson 3Edition 1999

### Reference Books Recommended:

- Neural Networks and Fuzzy Systems, A dynamical Systems Approach to Machine Learning, Bart Kosko, PHI learning private limited.
- Neural Networks, Fuzzy Logic and Genetic Algorithm: Synthesis and Applications, S. Rakasekaran, G.A. VijayalakshmiPai, PHI learning private limited, 14th Edition. 2003.
- Neural Networks and Fuzzy Logic, K. Vinoth Kumar, R. Saravana Kumar, S. K. Kataraia and Sons publication.
- Artificial Neural Networks, B. Yegnanarayana Prentice Halll of India (P) Limited.
- Introduction to Artificial Neural Systems, Jacek M. Zurada, Jaico Publication House.

### Online Resources:

- Introduction to Soft computing: What is soft computing Javatpoint
- Need for Soft Computing: <u>Need for Soft Computing GeeksforGeeks</u>
- Introduction To Soft Computing: <u>Introduction To Soft Computing Course (nptel.ac.in)</u>

### PART -D: Assessment and Evaluation

**Suggested Continuous Evaluation Methods:** 

Maximum Marks:

100 Marks

Continuous Internal Assessment (CIA):

30 Marks

End Semester Exam (ESE):

70 Marks

Continuous Internal

Internal Test / Quiz-(2): 20 +20

Better marks out of the two Test /

Assessment (CIA):

Assignment / Seminar -

Quiz + obtained marks in Assignment shall be considered against 30 Marks

(By Course Teacher)

Total Marks -

End Semester Exam (ESE):

Two section – A & B
Section A: Q1. Objective – 10 x1= 10 Mark; Q2. Short answer type- 5x4 =20 Marks

10

30

Section B: Descriptive answer type qts.,1 out of 2 from each unit-4x10=40 Marks

- VI. Blank Sheets: At the beginning and end of the report, two white black bound papers should be provided, one for the purpose of binding and other to be left blank.
- 5. **Abstract:** Every report should have an abstract following the Institute's Certificate. The abstract shall guide the reader by highlighting the important material contained in the individual chapters, section, subsection etc.
- 6. Certificates etc: The report should contain the following:
  - I. Institute Certificate: Successful completion of project by competent authority.
  - II. Acknowledgment
  - III. List of Figures
  - IV. Tables
  - V. Nomenclature and Abbreviations
- 7. Contents of the Project Report: The project report must contain following in form of chapter, however student may include any other relevant chapter(s):
  - I. Introduction to the project: This chapter shall highlight the purpose of project work, it will also define the chapters to be followed in the Project Report.
  - II. Scope of work: Brief scope of the project work done
  - III. Existing System and Need for proposed System: If there is some system already in use, then give brief detail of it in order to help to understand the enhancements carried out by the student in the existing system.
  - IV. Operating Environment: Hardware and Software required and used.
  - V. Proposed System: Which may contain following:
    - a. Objectives to be fulfilled: clearly define the objective(s) of the system.
    - b. User Requirements: State the requirements of the use in an unambiguous manner.
    - c. Requirements Determination Techniques and Systems Analysis Methods Employed: Use the formal methods to describe the requirements of the use like Fact Finding Methods, Decision Analysis, and Data Flow Analysis etc.
    - d. **Prototyping:** If the prototypes has been developed prior to the detailed design, then give details of the prototype.
    - e. System Feature: Which includes as follows:
    - Module specifications
      - D.F.D. and ER
      - System flow charts
      - Data Dictionary
      - Structure charts
      - Database /File layouts
      - Design of Input Design of Output screens and reports
      - User Interfaces
      - Design of Control Procedures
- 8. Testing procedures and Implementation phase
- 9. Problems encountered, Drawbacks and Limitations
- 10. Proposed Enhancements/ Future enhancement
- 11. Conclusions

Text Books, Reference Books and Others

### Text Books Recommended:

- Database system concept, H. Korth and A. Silberschatz, TMH Publications.
- Data Base Management System, Alexies & Mathews, Vikash publication.
- Roger S. Pressman, Software Engineering, A practitioner's Approach, 6th edition, McGraw Hill International Edition.

### Reference Books Recommended:

- The Complete Reference, Kevin Loney, Oracle Press.
- SQL, PL/SQL the Programming Language of Oracle, Ivan Bayross, PustakKosh Publication.
- Microsoft SQL Server Management and Administration, Ross, STM Publications.
- James Rumbaugh, Ivar Jacobson, The unified modelling language user guide Grady Booch, Pearson Education.

|          | At the end of this course, students will be able to:  Understand basics of AI.  Understand problem solving techniques of AI.  Aware about AI tools.  Explore application of AI in various domains.  Understand the current scenario of AI in India. |                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                      |               |
